- Notes: 1. Until 1980 the index base is 1948; from 1981 to the present, the base is 1980.
 2. In 1958, there were three groups and 34 articles in the basket. From 1980 there are five groups and 77 articles.
 3. The Institute does not consider it appropriate to link the two index series because of wide differences among them in terms of composition, nature of the articles and methodology in collecting price data.

TOTAL	2.87	3.61

Source: Evaluation of Haiti Small Farmers Marketing Project (1984)

- (1) Base price is the price received by the wholesaler and the cooperatives from the exporters and CEPEC.
- (2) Operating Cost (Expenses + Profits)
Expenses are minimal for wholesalers because exporters usually support transport cost.
- (3) Washed coffee is sold 7% higher than the price of cafe pile. Other factors being considered for the quality are: % of dirt, % of moisture, % of broken beans. Most of the time, the producers do not receive the bonus for quality when they sell wholesalers.
